Don--

Looks good to me. Just two small edits

For the comment on pg. 15, I would delete "completely" from the last sentence to soften it a bit. The sentence would then read: " Given its central role in this guidance, this paragraph is poorly written and confusing, and needs to be rewritten."

For the comment on pg. 23, I would spell out NDMM (or at least the "new development" part in case they aren't familiar with the shorthand).

 Jayne and Allison,

Thank you both for your messages. I expanded on the version that seems mostly comprised of Allison's comments and tried to clarify/consolidate the bits that Jayne added.

If you read over the attached version and provide concurrence, I'll send it around to the Oregon folks.

Subject: EPA/NOAA Comments on Draft TMDL Urban Impl Plan Guidance to ODEQ?

Hi Don,

I believe you agreed to send our written comments on Oregon's draft TMDL Urban Implementation Plan Guidance to ODEQ as you wanted to add a few more of your own. I have attached Allison's comments (with some of my comments incorporated--unfortunately I cannot understand many of my notes) as a starting point.[attachment "TMDL IP Dev for Urban & Rural Residential Land Uses Cmts.doc" deleted by Don Waye/DC/USEPA/US]

The following is from the May 12, 2010 letter....

New Development:

Complete TMDL Implementation Guidelines for the Coastal Nonpoint Program management area that incorporate the new development management measure requirements or practices consistent with the new development measure. Please provide NOAA and EPA with drafts of the guidance to review to ensure the final product will meet Coastal Nonpoint Program requirements.

Submit a strategy and schedule for completing and updating TMDL Implementation Plans within the Coastal Nonpoint Program management area to be consistent with the new TMDL Implementation Guidance.

Cheers,
